FantasticVon Philomena(Cheekypee)There is only a handful of authors who give me goosebumps while I'm reading their book... Rene is one of them.I read reviewed Rene's other book Bishop Street I loved it. This book if at all possible beats it. It's a heart wrenching story. Unfortunately we all know someone that has been touched by cancer. When reading this you will go through a lot of emotions. Cissy the main character is fantastic. This is her story of strength courage how her sons friends cope with her illness.Grab some tissues, find a quiet corner read this fantastic story from a brilliant writer.Received in return for an honest review.0 von 0 Kunden fanden die folgende Rezension hilfreich.

Compelling topic Von Fiona Hunt I was honoured to read this book for this author. I found it quite compelling in the topic she chose to tackle. I cried at the story. LOVED the characters. I even felt the pain they were all going through. 10/10 for me all the way.

Kurzbeschreibung If you died tomorrow... what would be your legacy? Death does not begin with the loss of the ability to breath, or the last beat of your heart. Cissy learns this as she takes us on an inspiring and eye-opening journey filled with love, friendship, laughter... and hope. This book is about the value of every moment of your life and fighting a good fight. Cissy is your typical hard working, single mother, who leads a very simple life. Until one day, when a cancer diagnosis has her spinning in circles. Not one to sit around and do nothing, and with years of experience in the medical field, she decides to research new medications and clinical studies on the Internet. Then all of a sudden, she hit a block wall. Why are the pharmaceuticals holding back orphan drugs that have the potential to save thousands of lives? Why arent they conducting clinical studies on these medications? Why are the greedy insurance companies refusing to pay for these medications to keep people alive? Why is our government closing its blind eyes? Cissy goes on a quest to find these answers. What she discovers is shocking. With an anger that leaves her cynical, and with time running out, she sets out to right a wrong. She does the unimaginable and is selfless in her final acts on this earth. She forfeits her integrity, and leaves a legacy that will crush the greedy pharmaceuticals and the corrupt insurance companies! In this new age of technology... Hackers become a reality and a new Robin Hood becomes our hero!
