Von Kate Ripley, Bob Daines, Jenny Barrett : Dyspraxia: A Guide for Teachers and Parents (Resource Materials for Teachers) before purchasing it in order to gage whether or not it would be worth my time, and all praised Dyspraxia: A Guide for Teachers and Parents (Resource Materials for Teachers):

KurzbeschreibungThe aim of this text is to promote an understanding of dyspraxia and movement development among professionals who work with children, and also to offer a text which is accessible to parents. It presents a cognitive

processing model of dyspraxia from a developmental perspective, and addresses issues of social development in addition to the more easily observable motor planning difficulties which are associated with dyspraxia. The difficulties which may face the dyspraxic child at home and at school are described with strategies for managing their difficulties. Details are provided of the support services available and how they may be accessed.
