Very good read Von Michael

Mahnkopf I highly recommend this book. It not only provides a very good summary of our evolution but also raises some intelligent questions about the future. You will not regret buying this book. 0 von 0 Kunden fanden die folgende Rezension hilfreich. wissenschaftlich fundiert, interessant zu lesen Von Gerald Glauerdt Sehr interessant geschrieben, allerdings teilweise etwas lang, d.h. koennte fuer wissenschaftlich nicht Interessierte teilweise Laengen haben. Das Thema ist jedoch hochaktuell und selbst wenn einige Seiten schnell/ quer gelesen werden definitiv ein Buch das jeder lesen sollte

Kurzbeschreibung THE SUNDAY TIMES BESTSELLER Planet Earth is 4.5 billion years old. In just a fraction of that time, one species among countless others has conquered it. Us. We are the most advanced and most destructive animals ever to have lived. What makes us brilliant? What makes us deadly? What makes us Sapiens? In this bold and provocative book, Yuval Noah Harari explores who we are, how we got here and where we were going. Sapiens is a thrilling account of humankind's extraordinary history from the Stone Age to the Silicon Age and our journey from insignificant apes to rulers of the world. It tackles the biggest questions of history and of the modern world, and it is written in unforgettably vivid language. You will love it! Jared Diamond, author of Guns, Germs and Steel Yuval's follow up to Sapiens, Homo Deus, is due in September 2016.
