Shifting FrequenciesVon Eric I.FreiThis is a rather interesting and compelling book for the Metaphysic enthusiast, and a wonderful starter to those intrested in New Age psychology. Those who are not however may still find this book a genuine perception into the world of New-Age mysteries, and those who are familliar with the conceptual insight of " Inner Light " may very well make good use of this book. Brilliant and Insightful, Shifting Frequencies really touches

common ground with the spiritual world without and within. Even those who do not believe will surely not turn away without some form of being enlightened. Self help is just around the corner, with this great self harmonizing and constructing message it sends out, you will feel rather enlightened and almost, illuminated. A better head on your shoulders, and this book will definitely take you there in its instruction based workbook like story medium that is easy for anyone to understand, and when reading this book in itself is a transitional change into a world of illumination. It works for me, it will work for you. A truly great insightful book.
