EnergieVon EmbyIch lese eigentlich keine Biographien, aber dieses Buch konnte ich nicht aus der Hand legen. In zwei Tagen hatte ich es durch und fing gleich wieder von vorne an.Nicht nur Fans der Filme Star Wars, Willow, Narnia, Harry Potter, Per Anhalter durch die Galaxis, Leprechaun, u.s.w. kommen auf ihre Kosten indem sie witzige und interessante Storys aus dem Backstagebereich erfahren;dieses Buch steckt einfach voller positiver Energie und Optimismus und zeigt wie es mglich ist trotz harter Schicksalsschlge das Leben anzunehmen und seinen Weg zu gehen.Dieses Buch liest man mit einem lachenden und einem weinenden Auge und man wei nie was einen auf der nchsten Seite erwartet.0 von 0 Kunden fanden die folgende Rezension hilfreich. fun hollywood triviaVon The Green OneThis book is very funny with lots of trivia from hollywood behind the scenes. It made me want to rewatch Star Wars, Willow, H2G2 and about all the other (many) films Warwick Davis was a part of.The fact that he is little, is both integral and not important at all to his story, so my main lasting impression is indeed his career, namedropping and humorous way this book is told.

KurzbeschreibungHi! Believe it or not, Im a world famous actor. No really, I am. Hey! Dont put the book back! Let me explain . . . You may not recognise my name or my face for that matter but its very likely youve seen me at work. Ive managed to cram quite a bit into my thirty-year acting career. In fact Ive helped put more bums on cinema seats than Will Smith or Tom Hanks. Who else can say that theyve helped destroy a Death Star? Defeated an evil sorceress? Taught magic to Harry Potter? Become a Jedi Master? Reluctantly hitchhiked across the galaxy in search of the answer to the Ultimate Question? Or embarked (six times, no less) on a psychotic killing spree as a gold-obsessed leprechaun? Ive also performed in a jazz club with the late, great Ray Charles, been kicked in the head by Ricky Gervais (twenty-three times) and have successfully navigated the Peterborough one-way system on more than one occasion. You may also have noticed that, at three-foot-six, I am ever so slightly below average height. My genes are arranged in a vaguely peculiar manner, which means I have a disorder that no one can pronounce (spondyloepiphyseal dysplasia congenita go on, try!) and very few people understand. This has thrown up its own trials and tribulations particularly when my wife and I tried to start a family but also in an everyday kind of way surviving a supermarket shopping trip, getting into fights with drunks, that sort of thing. So, without further preamble except to add that George Lucas, Carrie Fisher, Val Kilmer, Ron Howard, Ricky Gervais (amongst others) have chipped in I urge you, discerning reader, to read on and discover what life is like when it really is too short. At the very least, George Lucas will finally explain why there really is no underwear in space and who wouldnt want to know that?
